When and why did you join CSCMP?	I'm a VP of memberships in the CSCMP RT Spain. I joined CSCMP because I was impressed by the quality of the members and the thrilling networking opportunities! Beyond that, I wanted to continue sharpening my expertise in supply chain-especially through CSCMP's incredible events and knowledge-sharing forums.
What advice do you have for new CSCMP members on how they can maximize their membership value? What membership benefit do you find most valuable?	Join a RT. Also, I hope to attend a CSCMP Edge event soon! It's a must for anyone passionate about supply chain, and I can't wait to experience it firsthand.
What has been the most impactful connection you have made through CSCMP membership?	Mainly RT members of Spain and Europe in general. What I enjoy the most is the events! They offer a fantastic chance to connect with supply chain professionals. A particular highlight: I had the chance to share my insights in sustainable logistics as a speaker at 2024 CSCMP Europe! As a CSCMP Spain RT Board Member, it's been exciting to help organize local events in Barcelona and Madrid. The energy, collaboration, and amazing feedback received made it incredibly rewarding!

How did you get into supply chain management/logistics? Job offer ;) My current role: "Partnership Manager" at Lune Climate (a software company helping supply chain businesses build a climate-positive legacy)
Having built an intricate network in the transport and logistics space, I lead the logistic sector growth at Lune. Prior to my move into this climate, I launched the Spanish market at Oversea (Groupe Bolloré, a multimodal logistics operator based in Paris), developed business at Group Aéroport de Paris and consulted for Deloitte Digital. I also hold an Executive Master's in "Supply Chain & Logistics" and is a licensed lawyer. Lastly, I am a Board member at the CSCMP Spain RT. And, I was featured in Maritime SheEO as one of the next generation of women leaders in maritime.

What is the biggest challenge you face on the job, and how are you managing it? New role starting in 2025! I'm prioritizing and focusing on impact and results - being strategic

What technologies, trends, or disruptive forces do you see having the biggest impact on supply chains? Sustainability & automation
