Company	KronoLog Solutions
Title/Current position	Founder
Education	ISCTE Executive Education/Post-graduation in Logistics & Supply Chain Management
LinkedIn URL	https://www.linkedin.com/in/pedrofqueimado/
When and why did you join CSCMP?	<p>I heard of CSCMP last September, when Miquel Serracanta told me about his intentions of helping Portugal create our own Local Roundtable.</p> <p>I joined CSCMP because I want to help create a big Portuguese supply chain community that can help each other with knowledge and is united by the love for supply chain.</p>
What advice do you have for new CSCMP members on how they can maximize their membership value? What membership benefit do you find most valuable?	<p>As a member, I can access a great network of supply chain professionals that can give me knowledge and business opportunities. Besides that, we have access to state-of-the-art studies on the latest trends and best practices in supply chain.</p> <p>Maximizing the use of those two will help them maximize their membership value.</p>
What has been the most impactful connection you have made through CSCMP membership?	Miquel Serracanta. He is simply awesome.
How did you get into supply chain management/logistics?	<p>I have only worked in supply chain and logistics all my life. My minor is in Industrial Engineering, and I worked for 8 years in the biggest Portuguese food store chain in store and logistics positions.</p> <p>So it's been long! :-)</p>

What is the biggest challenge you face on the job, and how are you managing it?

As I work as a consultant at my own company, my biggest challenge is to achieve my clients' expectations on giving them the efficiency or the solutions they need.

What technologies, trends, or disruptive forces do you see having the biggest impact on supply chains?

I have a strong belief in collaborative automation in every form it can appear. Say in AI helping analyse data or documents, say AMRs helping operators on their daily work, such as picking or line feeding.
